## **Senior Full-Stack Engineer**

Full-stack software engineer with experience designing, building, and operating scalable web applications. Strong across frontend, backend, and infrastructure, with a focus on maintainable architectures, automated testing, and reliable CI/CD. Comfortable owning systems end-to-end in collaborative teams.

## **Skills**

**Languages & Frameworks:** JavaScript/TypeScript, PHP, Python, React, Laravel, Node.js

**Backend & Data:** REST, GraphQL, MySQL, relational & NoSQL databases

**Frontend:** React, Next.js, CSS/SASS, performance optimization, accessibility (WCAG)

**DevOps & Infra:** AWS, Docker, CI/CD, Git, monitoring, load testing (Grafana k6)

**Testing:** Jest, Playwright, Selenium, PHPUnit, TestCafe, TDD, visual regression testing

## **Experience**

### **Tech Lead — 3C Institute, Durham, NC 2021 – Present**

- Designed and implemented scalable full-stack solutions using React, Laravel, GraphQL, MySQL, automated testing, and AWS.
- Led development of the organization's flagship application, contributing to architecture, implementation planning, and long-term maintenance.
- Helped consolidate application services and infrastructure, reducing operational costs by nearly 50% in under one year.
- Built internal tools supporting research and development workflows, including a transcription service, resource platform, report builder, and time-tracking app.

### **Web Application Developer — 3C Institute, Durham, NC 2019 – 2021**

- Built responsive web applications with React and REST APIs backed by Laravel.
- Maintained and customized 20+ WordPress sites, improving analytics visibility and performance.
- Partnered with designers and product teams to translate requirements into user-focused applications.

## **Education**

**McMaster University** — Web Design & Development

**University of Toronto** — Commerce
